Complete-case confirmatory primary contrast - empirical CDF of task-level deltas
dotted guides at the seven pre-specified thresholds; curve to the RIGHT = larger effect
Overall: per-task mean across scorers (n=233)
By scorer: that scorer's own per-task delta
empirical CDF F(x) = P(delta <= x)
task-level delta, no_history - self_low_2 (score points)
task-level delta, no_history - self_low_2 (score points)
